

## Welcome To Project Photo..

I am EXCITED. I just LOVE taking photos – and can't wait to share my passion with you! I live to snap!

As the owner of a Scrapbooking store, I have many clients coming in asking about photographic services that don't cost a fortune. I have always had a passion for photography, buying my first film camera (which I still own) at just 12 years old. I know how important it is to capture the moments as our children grow bigger before our eyes.

I am a natural light photographer, so I can come to you in whatever location (within the metro area) you like! I just LOVE photographing children, adolescents and families and the bond that they share. I can customise each session to your requirements – and family!

Having 3 kids of my own I have LOTS of experience photographing children in LOTS of different situations and just LOVE to try new things. I love capturing the spark, the joy and the emotion that all children have.
